

The DecoRad[®] Handmate UV600 is a powerful and versatile UV handheld. This easy to use handheld is very portable and lightweight. The Handmate UV600 operates with a power input from 220 to 250V consuming 600 Watts. As with all DecoRad portable UV equipment the Handmate UV600 has a self-diagnostic system with display-notifications. Built-in ultrasonic sensors and shutter system for safety and correct distance to surface control. Compatible with all available coatings and lacquers.

Handmate UV600

Benefits of UV Floor curing

- Object can be used straight away
- Minimal inconvenience
- Easy to clean
- Eco friendly lacquers
- Industrial quality

UV coating and equipment

On-site UV coatings and lacquers are available for mineral, wood and resilient floors. Coating companies all over the world develop their on-site UV coatings with the use of DecoRad UV equipment. Those cooperation's are necessary in order to guarantee floors with industrial quality properties. A proper how-to-operate & safety training is required and is provided by DecoRad Systems or one of our local partners. Fast growing markets in on-site UV curing are resilient floors and warehouse line-marking.
